EDUCATION

Acharya Institute of Technology, Bengaluru 2023 – 2027

Bachelor of Engineering – Computer Science & Engineering | CGPA: 8.3/10

Coursework: Data Structures & Algorithms, Computer Networks, Operating Systems, DBMS, OOP, Software Engineering

EXPERIENCE

Pratinik Infotech Feb 2026 – Apr 2026

Machine Learning Intern · Bengaluru, India

- Built and automated ML data preprocessing pipelines in Python (Pandas, NumPy), reducing manual data preparation effort across multiple datasets.
- Trained and evaluated supervised ML models using scikit-learn; analysed performance metrics to guide iterative improvements.
- Wrote Python scripts to automate model testing and result logging, improving reproducibility across experiments.
- Assisted senior engineers with model deployment workflows, gaining hands-on exposure to production ML system integration.

PROJECTS

AI Career Assistant & Intelligent Resume Tailoring Platform | Python · FastAPI · Qwen3 · Ollama · REST APIs

- Built a modular AI career assistant that analyses job postings, matches opportunities to a candidate profile, and tailors resumes for individual roles.
- Developed a job intelligence pipeline that extracts requirements and evaluates compatibility across skills, role, location, work mode, and experience.
- Engineered a grounded resume tailoring pipeline that adapts existing candidate information to job requirements while preventing fabricated skills, experience, or unsupported technologies.
- Implemented AI resume generation, validation, and PDF rendering, with Qwen3/Ollama powering structured analysis and content generation.

AI-Based Parental Control System | Python · Computer Vision · FastAPI · Android Security

- Built a facial recognition system in Python that automatically switches device access modes based on the detected user, replacing manual parental controls.
- Implemented multi-layer authentication combining real-time face verification with OTP-based access control and secure biometric data storage.
- Developed a FastAPI backend on Linux to handle authentication requests, activity logging, and uninstall protection.
- Tested authentication flows to identify and close bypass vulnerabilities, improving overall system security.

AI Code Review Assistant | Python · FastAPI · LLM APIs · REST

- Built a Python tool that sends source code to an LLM API and returns categorised, actionable review feedback, automating a previously manual process.
- Designed a RESTful FastAPI service for code ingestion, prompt routing, and structured response delivery with low-latency API communication.
- Added context-aware prompting to generate semantically relevant code insights across Python, Java, and C/C++ codebases.

WarrantyChain – Blockchain Warranty Verification | Solidity · Ethereum · React.js · Node.js · Ethers.js

- Wrote and deployed Solidity smart contracts on an Ethereum testnet (Ganache) for warranty registration, verification, and ownership transfer.
- Integrated MetaMask wallet authentication for decentralised transaction approval, replacing paper-based warranty workflows.
- Built a full-stack DApp with a React.js frontend and Node.js backend communicating with blockchain nodes via Ethers.js.

TECHNICAL SKILLS

Languages: Python, C, C++, Java, JavaScript, SQL

AI & Machine Learning: Machine Learning, scikit-learn, Computer Vision, LLM APIs, OpenAI API, Qwen3, Ollama, ML pipelines

Web & Backend: FastAPI, REST API, Node.js, React.js, HTML, CSS

Systems & Linux: Linux/Ubuntu, Bash scripting, process management, TCP/IP, networking fundamentals

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Ganache, MetaMask, Ethers.js, Agile, OOP

Blockchain: Solidity, Ethereum, Smart Contracts

ACHIEVEMENTS & CERTIFICATIONS

- Top 10% finish (23rd of 200+ teams) at Hackaphasia Hackathon 2025 – systems and AI-focused challenge.
- Built a functional prototype under a 24-hour constraint at AmBITion Hackathon 2025, demonstrating rapid systems design under pressure.
- Machine Learning Internship Certificate – Pratinik Infotech
- Machine Learning and AI Foundations: Prediction, Causation and Statistical Inference – LinkedIn Learning
